

Payment Instruction Sheet

How to pay safely on the official payments page

Follow these steps exactly. Keep this sheet with your invoice. Your consultant can walk you through them, but **will never collect payment for you.**

STEP BY STEP

1. **Open the official payments page yourself.** Type worldbridgemeridian.com/payments into your browser. Do not use a link from an email, message or social post.
2. **Choose the asset and network on your invoice.** Asset: [\[asset\]](#). Network: [\[network\]](#). A different network can mean the funds are lost.
3. **Verify the address.** Compare the address shown with the QR code on the same page. Check the first and last characters carefully.
4. **Send the exact amount** shown on the invoice: [\[amount\]](#). Include enough to cover the network fee, so the full amount arrives.
5. **Submit your transaction reference** on the payments page: the transaction hash, your name and your invoice number [\[INV-0000\]](#).
6. **Wait for verification.** Our team confirms every transaction against the blockchain, usually within [\[number\]](#) business hours. You will receive a receipt by email. Your booking proceeds only after that receipt.

Protect yourself.

- World Bridge Meridian **never** sends wallet addresses by email, chat or documents.
- We **never** ask for your private key, seed phrase, password or exchange login.
- If someone gives you a different address, **do not send**. Contact us using the details below.
- If you think you were sent wrong instructions, contact us immediately.

COMMON MISTAKES

Mistake	What to do instead
Sending on the wrong network	Match the network on your invoice exactly
Sending a different asset	Send only the asset on your invoice
Sending less than the invoice (after fees)	Allow for network fees so the full amount arrives

Paying after the rate expiry time	Contact us for a new invoice before sending
Forgetting the reference	Submit the transaction hash and invoice number on the payments page
